

LET'S BE CLEAR

Blocked drains are a problem.
We work hard to keep
them flowing.

Most blockages are caused by wipes,
cooking fat and oils.

These items prevent waste from flowing
properly, causing major problems in
the drainage network. This can result in
sewer flooding, environmental pollution
and even the back up of sewage into
your property.

WE NEED YOUR HELP!

BIN

Wipes, cotton wool / buds,
disposable menstrual products,
fats, oils, grease, and hand towels.

FLUSH

The three Ps: Pee, poo and paper.
