

SWITCHING TO A METERED SERVICE

More and more of Guernsey Water's customers are now having water meters fitted – in fact there are now more metered customers than there are unmetered customers in the island!

The Figures

No. of Occupiers	Average Quarterly Usage	2021 Quarterly Bill [including standing charge]
1	15 cubic metres	£80.15
2	30 cubic metres	£121.08
3	45 cubic metres	£162.01
4	60 cubic metres	£202.95
5	75 cubic metres	£243.89

If you have a water meter fitted to your property, you are charged according to the quantity of water that you actually use, rather than the TRP of your property.

How can I use less water?

In The Kitchen

- 💧 Mend that leaky tap! And never leave a tap running
- 💧 Only use your washing machine & dishwasher on a full load
- 💧 Store drinking water in a jug in the fridge rather than waiting for the tap to run cold.

Continue overleaf →

In The Bathroom

- 💧 Taking a quick shower uses a lot less water than a bath.
- 💧 Turn the tap off whilst you brush your teeth!
- 💧 Put the plug in the basin and only run as much water as you need

In The Garden

- 💧 Use a water butt to collect rainwater, use this water for watering plants
- 💧 Use a watering can instead of a hosepipe or sprinkler
- 💧 Water plants when its cool (early morning or during the evening) to reduce evaporation
